ajaxCFC small fixes

Posted At : December 13, 2005 11:12 AM | Posted By : Rob Gonda

Related Categories: ajax, ajaxCFC, Coldfusion

I just updated the project files to include the following fixes:

- replaced the /exec/method after the CFC call with get or post vars because it was being misinterpreted by some web servers
- Forced ColdFusion debugging to stay off for   ajax calls because they were breaking the JavaScript response.

Thank you Steve and Tony for your help.
