1.2.6 is now out and the events handling functionality is 103% faster:

- CSS Selectors are 13% faster
- .offset() is 21% faster
- The DImensions plugin   is now part of the core
- toggle() can now accept more functions
- attr() has had an overhaul
- You can now unbind bound toggle() and one() functions
- .index() supports jQuery collections
- jQuery.makeArray can convert ANYTHING into an array
- beforeSend() can cancel AJAX calls
- You can now define your own animation speeds with the jQuery.fx.speeds object
