Apple is making more drastic updates to its [MacBook Pro lineup](#). The company announced that its new MacBook Pros are now built on the *Santa Rosa* platform and features the latest [GeForce 8 series mobile GPUs](#) from NVIDIA and LED backlighting on 15.4" models.

The \$1,999 entry-level MacBook Pro features a 2.2GHz Core 2 Duo processor, 2GB of DDR2-667 memory, 120GB 5400RPM HDD, NVIDIA GeForce Go 8600M GT (128MB) and a 15.4" 1400x900 LED-backlit display.

If you fork over \$2,499, you'll be greeted with a 2.4GHz Core 2 Duo processor, 160GB HDD and a 256MB version of the NVIDIA GeForce Go 8600M GT -- all other specifications remain the same.

They finally allow to upgrade to a 7200RPM HD, 4Gb of RAM ... That's it, I'm getting one.
